

SELECT PCB

SELECT PCB

Carlsbad, CA USA

Headquarters

- 1) Printed Circuit Board Assembly
- 2) Prototypes
- 3) Low to Med Volume Production
- 4) Fabrication
- 5) In-House Engineering
- 6) Sales Office
- 7) Project Management
- 8) Supply Chain Management
- 9) Box Assembly

- 1) Large Volume Production
- 2) Box Assembly
- 3) In-House Stencil Manufacturing
- 4) 35,000 useable sq ft.
- 5) Volume Fabrication-Domestic

Portland Oregon

FACILITIES

Newcastle, England

- 1) Research & Development
- 2) Electrical Engineering Group
- 3) Mechanical Engineering
- 4) Tech and Support Services

- 1) Complete embedded wireless product design service. Including Antenna support.
- 2) Embedded firmware development.
- 3) IOS Mobile App Development.
- 4) Android Mobile App Development.
- 5) Web / Server support services to support

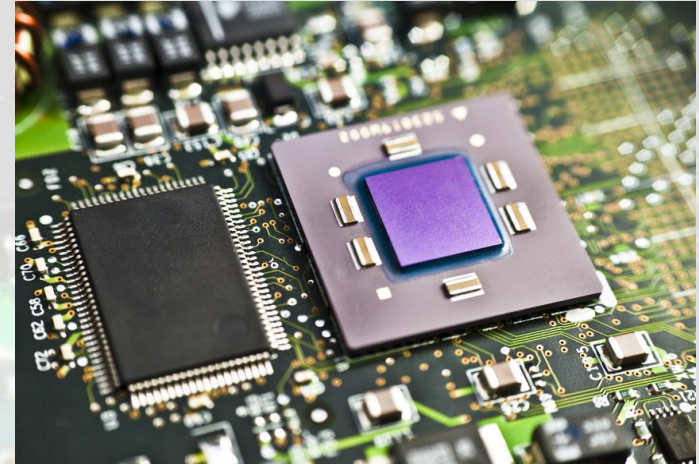

Karnataka, India

BUSINESS CONCEPT

- Commitment to Quality
 - Long Term Relationship
 - Turn Key Business
 - Responsiveness & Flexibility
 - Continuous Improvement
 - Customer's Satisfaction
 - Full Range of Electronics Assembly and Design Services
-
- Select PCB recognizes our approach to customer service has been secured by our unique collaborative engagement with customers, working seamlessly to ensure each business can focus on its core competencies.

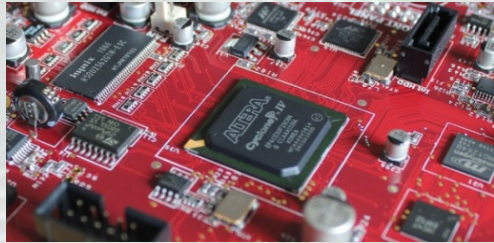

Our Services

- Full Turn key Services
- Complete Product Assembly (Box Build)
- Functional Testing
- Design Engineering Services
- Lead Free Process
- Design For Manufacturing (DFM)
- Offshore Manufacturing Partners
- Large Vendor Distribution
- Kan Ban Inventory
- Embedded Systems Solutions
- Programming / Flash Testing Services
- X-Ray
- Project Management
- Conformal Coating
- Potting

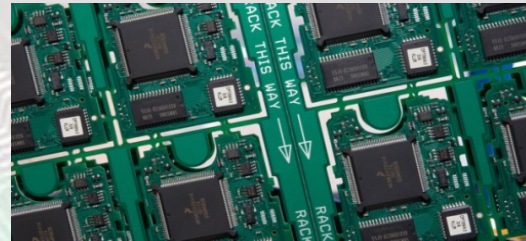

- *Select PCB utilizes all of our resources to ensure a smooth production that follows strick Quality control while maintaining cost efficiently!!!*

Offshore Capabilities

- Our offshore operation allows us to service your high volume production needs.
- Leaded and lead-free Assemblies
- Single or double sided SMT
- Thru-hole, SMT, and mixed assembly
- Passives down to 0201 sizes
- BGA and micro BGA
- Full PCB Fabrication

Located in Shenzhen China Select PCB has partnered with the following

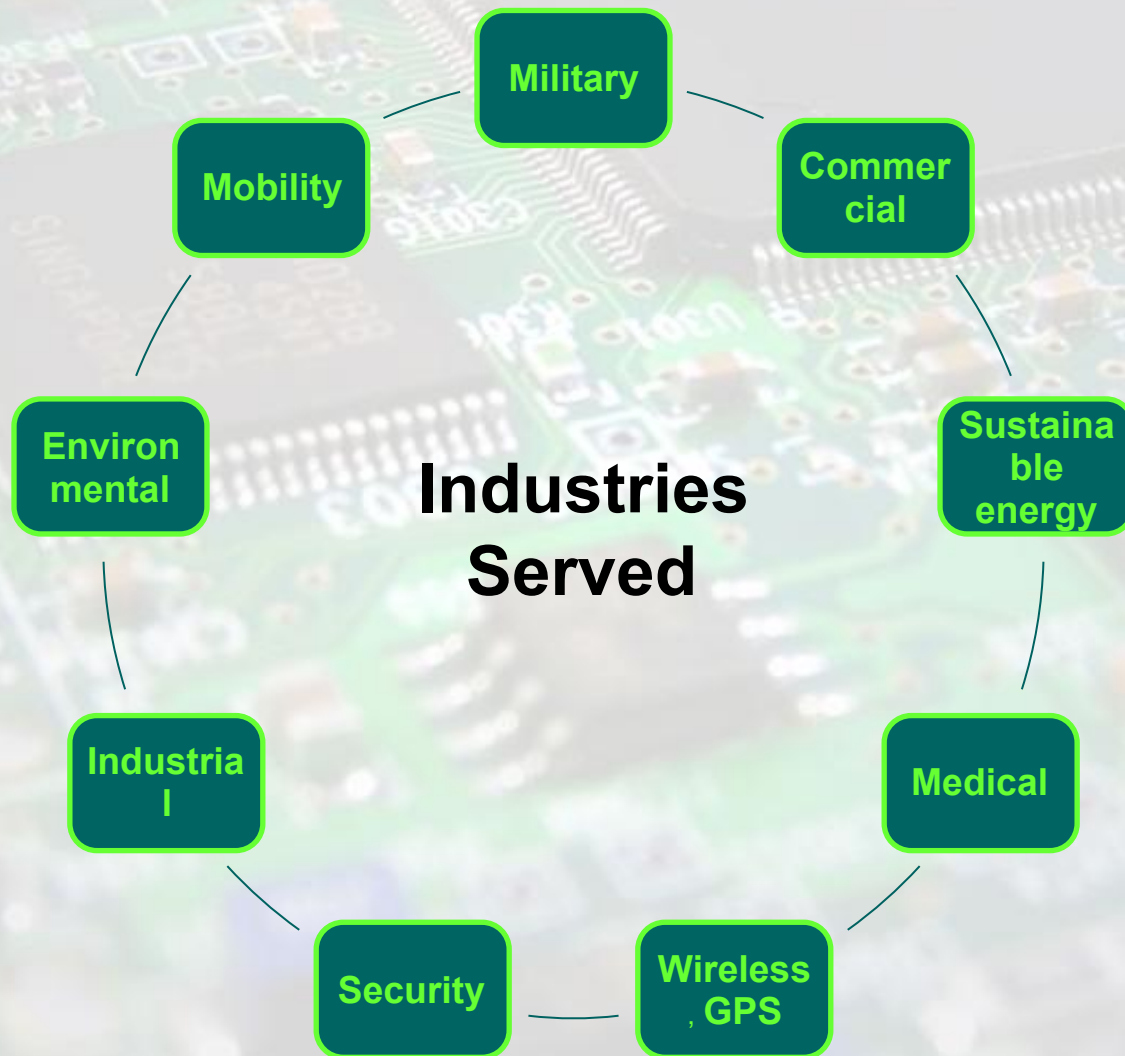

PCB Assembly

C&B Technology Co., Ltd
4th Floor, Building 2, Yali Industry Park,
Baoan, Shenzhen, China

PCB Fabrication

Shenzhen Huihe Circuits Co., Ltd
Building 1, Cuigang Industry Park3
Fuyong Town, Shenzhen, China

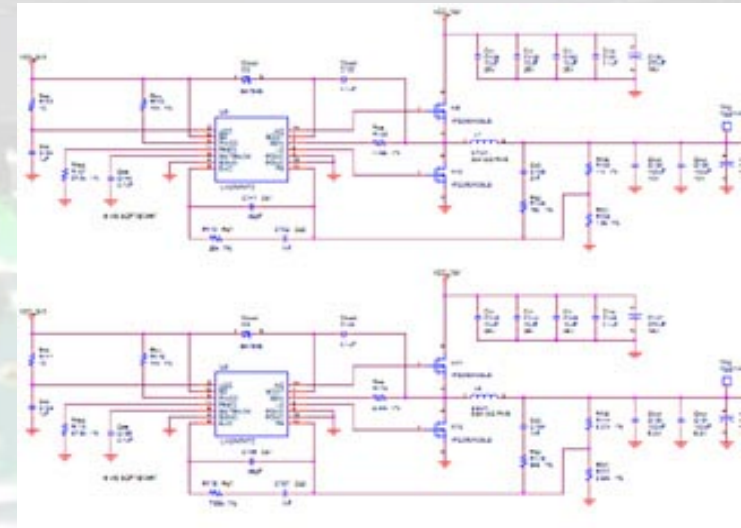

Industries Supported

Select Engineering

Select PCB provides a full range of design services spanning the entire product life cycle including:

- Product Requirements Review
- System Design
- Circuit Design
- Circuit layout, utilizing Allegro, PADS, Expedition and Altium toolsets
- Embedded Software (Firmware)
- Algorithm Development
- Mechanical Design
- Test Strategy
- Documentation Creation and Management
- Sustaining Engineering
- RoHs Compliance

Utilizing dedicated in-house resources for mechanical engineering, hardware engineering (analog, digital and RF) and embedded software development, we can customize a solution to meet your program requirements.

Supply Chain

Select PCB has developed a supply chain management process which centers on Lean manufacturing Philosophy using quality vs. cost strategies that can adapt to customer needs. While our manufacturing facilities are located within North America, we recognize the value of global sourcing. For that reason, we established the following;

Downstream Dependence

We are prepared. Analyzing and being perceptive of future trends in the supply chain helps us stay on the forefront of measuring risks and maintaining optimization. Our understanding of these variables ensures our offerings are aligned with your goals and your components are sourced through the most efficient process. Accurate forecasting leads to better planning and execution.

Acquisition, Procurement, Fulfillment

Having multiple parties involved in your production process calls for strict over watch of many supply-chain functions. Our internal team is focused on many factors including logistics, warehousing, readiness, sustainability and security. These functional areas are key to your Success and our internal risk mitigation.
